

St. James' Church Restoration Fund

St. James Church, Dingle is of historical significance through its Spanish patronage in the medieval period and its associations with the pilgrimage routes of St. James of Santiago de Compostela - it is a much loved place of worship for church members and visitors alike, as well as an important asset to the wider community from its use as a concert and arts venue.

Historic buildings constantly need maintenance and repair and St. James is no exception - to restore this iconic building and whilst retaining its unique character, improve its facilities for the future, we need to spend at least €500,000. We will be working hard to raise money to fund this project and are grateful for any donations from people for whom this church has special memories. We thank you for your generosity in donating to the Restoration Fund.
